MANAGED CLOUD SOLUTIONS

Cloud-as-a-Service Delivers Secure Tier III Infrastructure

We can show you how to make your servers next to bullet proof using CaaS and get you out of the endless upgrade cycle you're stuck in. Hardware and Software licensing is expensive. Especially having to upgrade every 3 years or so to stay up-to-date with security updates that protect your infrastructure. Cloud-as-a-Service lets you have a fixed cost for what you use, scales easily. and shifts that burden to us as the provider.

CasS 360 will get you out of the Cycle of Buying Hardware

Eliminate costly upgrade and hardware replacement cycles by us CaaS 360 to fully replace on-premise servers and free up that money to prow your business instead of buying server, server licensing, and backup solutions that are already incorporated into the solution. Microsoft licensing is included in the model.

Cloud Experts

AIO has an entire team of cloud experts to seamlessly migrate your existing servers to the cloud and create secure bridges between your workers and your cloud servers.

99.999% Uptime

AIO has a financially backed SLA of 99.999% uptime for your servers. Our centers are Tier III HIPAA and PCI compliant with redundancies on everything including power & connectivity

Central Management

Manage your entire cloud environment securely from anywhere on any platform with no special software. We have provided a very simple way for you to manage and grow your business without having to add workload to your team.
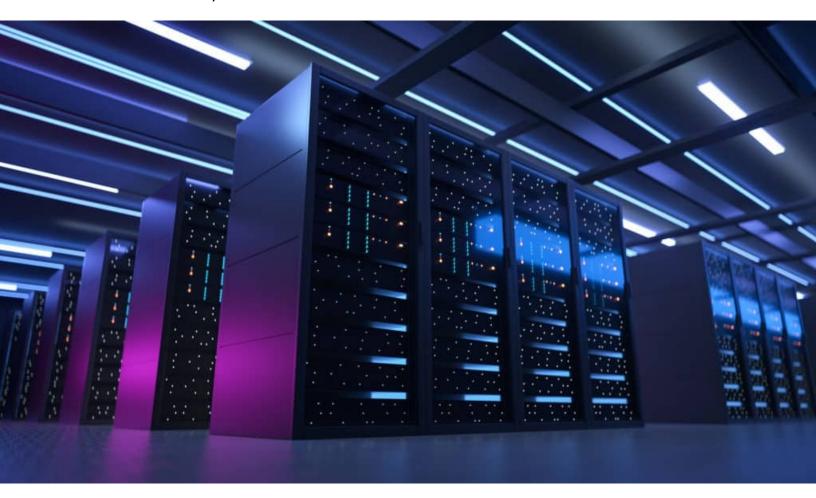

24/7 Support

We provide 24/7 monitoring and support for your solution. With the ability to snapshot your entire instance daily, we can revert any part of your environment back to a given time within 30 day in minutes. This provides business continuity and its built-in.

We're redefining the managed cloud platform for any size business!

Why Use CaaS 360?

All clouds are not equal. CaaS 360 is based on Open Source Technology, not proprietary platforms like Azure and AWS. CaaS 360 is about Maximum Uptime, Compatibility and Value. We don't want to limit your options, or lock you into proprietary systems. CaaS 360 can provide the most compatible and reliable environment for any business. In fact, our clients have benchmarked CaaS 360 against Azure, AWS and others only to find we are 35% faster and nearly 50% less cost.

Unlike the Major Players in this vertical, we have a small business mentality that likes to deliver more bang for your buck. We charge you for only one metric, the cost of the resources. You pay for what you use on a month to month basis. This allows you to save money, grow your business requirements and easily scale up or down as required to adjust with your business without being locked into an expensive contract.

Migration Costs

Using industry standard tools, we will clone your current environment straight to our data centers. Once there and verified by your team, we setup VPNs between desired offices and people to your fit environment. Once tested, we true up the data and cut you over with no down time. This makes migrating your existing servers to the cloud even safer.

Performance vs Competitors

All clouds are not equal. CaaS 360 is based on Open Source Technology, not proprietary platforms like Azure and AWS. CaaS 360 is about Maximum Uptime, Compatibility and Value. We don't want to limit your options, or lock you into proprietary systems. CaaS 360 can provide the fastest and reliable environment for any cloud application. In fact, our benchmarks against Azure, Google and AWS show we are more than 35% faster and nearly 50% less cost.
