

Compliance 360 Delivers Complete Data Security

Compliance 360 is a simple, flexible, and intuitive security solution. Data Loss Prevention (DLP) makes your data useless outside of your company's network through seamless encryption implemented network-wide by policies. Our proprietary software protects your company against all known threats, and puts you firmly in control of your data, working automatically 24/7 to identify and safeguard your sensitive data.

We're revolutionizing cybersecurity with the first truly autonomous data security platform!

Compliance 360 will keep your data safe, no matter what the threat!

Compliance 360 democratizes data security and gives every company and organization the tools to locate and secure sensitive data. Our mission is to provide a rock-solid foundation of cyber security that allows your business or service to grow and achieve its fullest potential.

WHY YOU NEED COMPLIANCE 360!

Companies and service providers of all sizes are uniquely vulnerable to data leakage and ransomware attacks. As a result, they face devastating financial consequences when sensitive data is compromised.

Firewalls and antivirus tools are inadequate against today's cyber threat actors. The average initial cost of a data breach is \$4 million, and 60% of companies that suffer data leaks or ransomware attacks go bankrupt and close their doors within six months.

**Don't wait and let this happen to your company!
Get Protected Now**

**Locate sensitive data
and map risks in real
time**

**Calculate financial
penalties and
liabilities for data
leaks and ransomware
attacks**

**Remediate data risks
and apply automated
encryption**

Who Should Use Compliance 360?

Compliance 360 is the perfect and affordable solution for small and medium size companies to achieve maximum data security with just a click of a button! Existing cyber security solutions are complicated, frequently unwieldy, and seldom provide genuine multi-level protection. They come with a high TCO and are rarely user-friendly for the average employee.

Compliance 360's game-changing autonomous data security solution is non-intrusive and easy to use. It won't slow your systems, disrupt your workflow, or alienate your employees.

Sleep soundly at night, and focus on future growth without fear of being hacked or compromised. Your company's data, R&D, future projects, and financial data are safe from malicious actors and employee negligence or sabotage.

Compliance 360 will keep your data safe, no matter what the threat!

Contact us today for a COMPLIMENTARY cyber risk assessment! We'll show you what hackers see from the outside looking in. When you see what's at risk a full data security assessment can be made to show you where your liabilities are within your organization and how we can greatly reduce that risk of loss.

Protection for new start-ups, growing businesses and major enterprises.

Your employees can work remotely and across multiple devices. Your sensitive data is always secure.

Make a safe transition to a cloud based solution. Your encrypted data is worthless to hackers.
